BIOTEC post doctoral fellowship announcement

Thailand’s National Center for Genetic Engineering and Biotechnology (BIOTEC) is seeking 4 positions for post-doctoral researchers in area of Molecular biology, Genetics, Cell biology and Computational Chemistry, Molecular Modeling, Crystal Structure:

Position 1: Identification of new compounds that have potential use in antimalarial combination therapy
Position 2: Computer-Aided Drug Design for new effective PfDHFR inhibitors
Position 3: Mechanisms of resistance to the Brown planthopper (BHP) in rice
Position 4: Development of oil palm micropropagation by liquid culture to increase the efficiency for oil palm propagation

In addition, BIOTEC also partners with TWAS in offering TWAS-BIOTEC Postdoctoral Fellowship Programme catering specifically to young scientists from developing countries outside of Thailand to carry out postdoctoral research in BIOTEC laboratories.
