

Recruiting now for the 2015-16 MSc in Marine Biotechnology

Up to 12 fee-paid scholarships available to Scottish/EU applicants. For further details, please click [here](#).

MSc in Marine Biotechnology course, which is hosted in the **Institute of Aquaculture** at the **University of Stirling**, UK.

There are **up to 12 Scottish Funding Council-funded scholarships** available to cover the full course fees for eligible applicants from Scotland or the EU (unfortunately this excludes residents of England, Wales and N. Ireland). The Marine Biotechnology team is inviting applications from prospective students who would like to broaden their understanding of marine life and learn about commercial opportunities to develop new biotechnological products and services.

For more details on this course (or other postgraduate opportunities that we offer at the Institute of Aquaculture), then please see the attached information or email us at marine.biotechnology@stir.ac.uk.
